

Associate Product Manager

Alpine Loop Software · Lehi, UT (hybrid, 3 days in office) · Full-time · Starts June 2027 · \$88,000–\$102,000 + equity

About Alpine Loop Software

Alpine Loop Software builds an AI-powered IT operations platform for managed service providers (MSPs) and small-business IT teams. More than 1,200 MSPs use Alpine Loop to enroll and secure devices, manage Microsoft 365 tenants, and let AI agents resolve routine support tickets. We are a 140-person B2B SaaS company in Lehi, and our product team ships every week.

The role

As an Associate Product Manager on our Device Management team, you will own the onboarding experience for new MSP customers: how their client tenants, devices and policies come into Alpine Loop from Microsoft Intune and Entra ID. You will work with a senior PM, a designer and five engineers, and you will spend a lot of time with the IT consultants and technicians who use the product every day.

What you will do

- Run discovery calls with MSP technicians and IT consultants, gather requirements and turn them into clear problem statements
- Write PRDs and user stories, and prioritize the backlog with engineering
- Design workflow automations and AI agent features that remove manual steps from device rollouts
- Define success metrics and analyze adoption with SQL
- Help customers through pilots of new features, from technology implementation to launch

What we are looking for

- Bachelor's degree in Information Systems, Computer Science or a related field by June 2027
- Hands-on experience with Microsoft Intune, Entra ID or Microsoft 365 administration (internships count)
- Requirements gathering with clients or end users, in consulting, IT or a technology implementation
- Process automation or workflow automation experience, in Python, PowerShell or a tool like n8n
- Familiarity with AI agents and LLM APIs
- Comfort writing SQL to answer product questions
- Clear writing, and the patience to troubleshoot a customer's problem until it is solved

Nice to have

- MSP, help desk or IT consulting experience
- You have built and shipped your own app or side project
- TypeScript or React

How to apply

Apply on Handshake by December 1, 2026. We will be on campus at BYU this fall for info sessions and a PM case night; come say hi.

Sample job posting created for the Doorway hackathon demo. Alpine Loop Software is a fictional company.
