

Jordan Ellis

Provo, UT · (801) 555-0142 · jordan.ellis@example.com · linkedin.com/in/jordan-ellis-sample-profile · jordanellis.example.com

EDUCATION

Brigham Young University, Provo, UT

B.S. in Computer Science · Expected April 2027 · GPA 3.68

Relevant coursework: Data Structures and Algorithms (CS 235), Advanced Programming Concepts (CS 240), Web Programming (CS 260), Algorithm Design and Analysis (CS 312), Systems Programming (CS 324), Software Design (CS 340), Database Modeling Concepts (CS 452)

EXPERIENCE

Software Engineering Intern, Quarry Lane Software, Lehi, UT · May 2026 – Aug 2026

- Built a React and TypeScript scheduling dashboard used by 120 property managers, replacing a spreadsheet workflow.
- Cut the dashboard's initial load time from 4.1 s to 1.6 s by paginating a PostgreSQL query and caching results.
- Wrote a Python job on AWS Lambda that syncs listings nightly, with alerts that caught three failed syncs before customers noticed.
- Shipped 31 pull requests across the front end and back end, and demoed the finished dashboard to the whole 40-person company.

Teaching Assistant, CS 240, BYU Computer Science Department · Jan 2025 – Present

- Hold eight hours of office hours a week for a 300-student course, helping students debug Java projects.
- Rewrote two autograder test suites in Java, cutting the false failures students report by about half.

Full-time Volunteer Representative, Lima, Peru · Jun 2020 – Jun 2022

- Led weekly planning for a team of 12 volunteers and taught classes in Spanish (fluent).

PROJECTS

ClubSync · React, TypeScript, Node.js, PostgreSQL

- Merges the event calendars of six campus clubs into one subscribable Google Calendar feed. About 250 students use it each week.

QuickQueue · Python, FastAPI, React · built at a 24-hour hackathon

- Office-hours queue that texts students when a TA is ready for them. Two TA teams kept using it after the event.

Path tracer · C++

- Multithreaded renderer with a work-stealing thread pool, six times faster than the single-threaded version on an 8-core laptop.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL

Frameworks: React, Node.js, Express, FastAPI

Tools: AWS (Lambda, S3), PostgreSQL, Docker, Git, Figma

ACTIVITIES

- Member, BYU ACM student chapter (2023 – present)
- Member, Product Management Association (2025 – present)

Sample resume for the Doorway hackathon prototype. Jordan Ellis is fictional, and the phone number, email, links and companies are placeholders.
